

# Online Seminar on Cathodes in Lithium-Ion Batteries

Wednesday 4th of May 2022, 14:30 – 16:00 (CET)

Join us for the second event of our online seminar series in 2022! This time our speakers will discuss the recent hot topics of **layered oxide cathodes in lithium ion batteries**, covering the material side as well as the challenges of aqueous processing.

## Prof. Matteo Bianchini (University of Bayreuth)

*„Recent Advances Towards Practical near-LiNiO<sub>2</sub> Cathode Materials “*

## Dr. Werner Bauer (Karlsruhe Institute of Technology)

*“The pH Issue in the Aqueous Processing of Cathodes for Lithium-Ion Batteries”*
